Abstract of JP11188817

PROBLEM TO BE SOLVED: To provide a polystyrene heat-shrinkable label having a main component of polystyrene, which does not generate harmful material after incineration, has good frosting or pearl appearance, and is capable of fitting to a container so as to obtain good finish.

SOLUTION: A polystyrene heat-shrinkable label is provided with a printed layer 3 on at least one side of a base film 2. The base film 2 is composed of a film formed of a composition, where 10-40 wt.% acrylic resin having a refractive index difference from a styrene-diene resin of at least 0.01 is mixed with the styrene-diene resin.
